HAE Day :-) 2024

This year's hae day :-) was a great success in spreading awareness and education about HAE to medical professionals, researchers, and the general public. Since 2012, the HAE community has come together on May 16th to promote HAE awareness, advocate for better therapies and an improved quality of life, and motivate the quest for new and better HAE treatments. To learn more about how the community recognized hae day :-) this year, visit the [HAEA website](#).

At Astria, we marked the occasion with a company walk through Boston. The extra steps supported our month-long step-count competition in support of the #Active4HAE challenge. Throughout May, Astrians walked over 13 million steps to raise awareness of HAE and commemorated the accomplishment with a charitable donation to HAEA.

We were also pleased to introduce a video interview with Melissa and Hannah, a mother-daughter duo who are both living with type I HAE, whose conversation served to create deeper appreciation for the realities of living with HAE. You can [view the video](#) on our website.

Astria's Capitol Hill Day

Also in May, members of Astria's team traveled to Washington, D.C. to participate in our own "Hill Day." Team members met with key staff of lawmakers focused on critical healthcare policy to amplify the voices of people living with HAE and advocate for broader access to medicines.

If you are interested in learning more or getting involved in advocacy, check out [HAEA's grassroots advocacy network](#).

HAE IN MOTION® — Boston Event

Several Astria team members joined the HAE IN-MOTION® walk on June 15 at the Franklin Park Zoo. We are grateful to the HAEA for creating this opportunity to connect with members of the HAE community while enjoying a beautiful day at the zoo.

Astria's Inaugural Corporate Social Responsibility Report

We are thrilled to share our first Corporate Social Responsibility (CSR) Report! The report highlights how we're working to make a difference for all of our stakeholders, including people living with HAE and their loved ones, healthcare providers, Astria team members, shareholders, our local community, and our world. We could not have created this report or achieved the milestones detailed within it without the support, insights, and extensive collaboration with members of the HAE community, and we continue to be immensely grateful for these connections. The report is available to download [here](#).

Patient Advocacy at Astria – Meet Regan Sherman

We were pleased to welcome Regan Sherman to Astria's patient advocacy team in April. Regan has nearly 20 years' experience working with patient communities, both as an advocate and as an intermediary between life science companies and the people they are developing treatments for. At Astria, her main objectives will be to ensure that our decisions are informed by the experiences and perspectives of people living with HAE and to create opportunities for our team to engage with the HAE community. She believes that hope is a verb and that we will continue to make progress by working together. You can reach Regan directly by email: rsherman@astriatx.com.
